Q1A

| | | |
|---|---|---|
| Int length, width area | Input | length, width, area |
| Process area = length x width | Process | area = length x width |
| output display area | Output | display area |

Start
Declare int length, width, area

Display "Enter a length:"
Read length

Diplay "Enter a width:"
Read width

Process area = length * width
Display "The area of a rectangle:", area

End
Start
Read Length and width from user input
area is the result of length multiply with width
Display area
End

Q1B

| | |
|---|---|
| input | size1, size2, size3, area1, area2, area3 |
| Process | area1 = size1 × size1, area2 = size2 × size2, area3 = size3 × size3 |
| output | Display area 1, Display area 2, Display 3 |

Start
Declare int size1, size2, size3, Area1, Area2, Area3

Display "Enter size for square 1:"
Read Size1

Display "Enter size for square 2:"
Read Size2

Display "Enter size for square 3:"
Read Size3

Process Area1 = Size1 × Size1
Process Area2 = Size2 × Size2
Process Area3 = Size3 × Size3

Display "Area of square 1 is:", area1
Display "Area of square 2 is:", area2
Display "Area of square 3 is:", area3

End

Start
Read size1, size2, size3 from user input
Area1 of square1 is size1 times size1
Area2 of square2 is size2 times size2
Area3 of square3 is size3 times size3
Display Area1, Area2, Area3
End

Q1E

| | |
|---|---|
| Input | Total, E1, E2, E3, E4, E5, rate |
| Process | E1=E1*rate, E2=E2*rate, E3=E3*rate, E4=E4*rate, E5=E5*rate, total=E1+E2+E3+E4+E5 |
| output | "Total salary of 5 employees are", Total |

Start
Declare int total, E1, E2, E3, E4, E5, rate

Display "Enter hourly rate"
Read rate

Display "Enter hours worked for employee 1"
Read E1
E1 = E1*rate
Display "Enter hours worked for employee 2"
Read E2
E2=E2*rate
Display "Enter hours worked for employee 3"
Read E3
E3 = E3*rate
Display "Enter hours worked for employee 4"
Read E4
E4=E4*rate
Display "Enter hours worked for employee 5"
Read E5
E5 = rate*E5

* Total = E1+E2+E3+E4+E5
Display salary of 5 employees are", Total
End

Read hourly rate, E1, E2, E3, E4, E5 from user input.
~~Total = E1+E2+E3~~
Multiply all of Es with rate and then add them together into Total
Display Total
